Confidential Anti-Aging Report!

Dear Friend:

I want to first thank you for requesting and then taking the time to read my report. Before you begin I would like you to know that I have successfully helped many people fully recover from pain, even stubborn low back pain. Perhaps, you asked for this report or maybe it was given to you by someone concerned about your health or well-being.

So, if you are curious about natural solutions to anti-aging, please read on...

Read The Report As Many Times As You Would Like And When You Are Through Please Share It With A Friend.

You'll Learn:

- * *What treatments medical doctors do that can adversely affect your body.*
- * *Where to get information so you can make an informed choice of care and treatment.*
- * *Why doctors are praying you don't read this report.*
- * *Why we are the way we are with the health standard in America today.*
- * *Why taking drugs and having needless surgeries to correct aging are not always the proper answer.*
- * *How you can be proactive in the pursuit of youth.*
- * *What will happen if you don't get natural treatments now, and much more?*

WARNING: “Did you not know that millions of people are misdiagnosed every year and treated with harmful chemicals in their body which have devastating side effects leading to ill health?”

The GOOD NEWS is that you don't have to take these harmful chemicals used to treat problems related to aging. Keep reading this report to find out the well-hidden truth you won't find anywhere else.

“The Diseases And Illnesses That Are Related To Age Are Often Misunderstood, and difficult to detect. Many victims who go to doctors are told that this is just a natural part of aging and told to rest. Rest alone usually creates even greater weakness and problems.”

You know one of the most stressful aspects of aging is dealing with aches and pains that seem to have no cure.

They are treated like symptoms with no cause found. The doctors seem to treat the problem with one of their many multi-billion dollar wonder medications and provide temporary relief with latent side effects that can effect the liver, nervous system, virtually all the systems in the body negatively.

“SO WHO IS AT FAULT?”

Most medical doctors are trained in a manner that focuses on symptomatic, short-term, emergency, quick-fix-type-of-care because most don't have the training in cause and effect. Their training using pharmaceutical agents mostly masks the symptom and rarely eradicates the cause of disease.

“Alright, So What Are The Many Symptoms Of Aging?”

- * **Decreased Immune Function**
- * **Increased Confusion**
- * **Increased Memory Loss**
- * **Decreased Energy**
- * **Low Sex Drive**
- * **Irritability**
- * **Lack of Sleep**
- * **Decreased Digestion**
- * **Increase in production of Dry, Scaly Skin**
- * **Increased Hair Loss**
- * **Decreased Elimination**
- * **Increased Body Fat**
- * **Decreased Lean Muscle Mass**
- * **Increased Loss Of Vision**
- * **Increased Loss Of Hearing**
- * **Decreased Sense Of Taste**
- * **Decreased Sense Of Smell**
- * **Decreased Touch Sensitivity**
- * **Increased Chance Of Diabetes**
- * **Joint Stiffness**

**“A GENERAL SLOWING DOWN, COUCH
-POTATO SYNDROME IS DEVELOPING!”**

And...

Each year Millions of Americans go to see their Family doctor or general practitioner and spend Billions on prescriptions that don't get to the underlying cause – see Americans are treated from the “Outside in”- We already had the systems intact and in full operation when we were in our 20's –“What's Changed?” You see doctors aren't trained in the field of Anti-Aging Health Care - the result: if they can't effectively treat you, they tell you nothing is wrong with you and to go home and it's in your head.

WELCOME TO THE MEDICAL 'LOOP OF CRAZY'!

The patient goes back for further treatment frustrated and feeling unheard and unattended to. The doctor in exasperation prescribes similar, however, different medications despite the symptoms that don't Remiss - the condition is made worse by the side effects of the medication and the patient becomes worse from toxic drug interactions. Inappropriate treatment causes complications and thus more problems than one originally had. This leads to further downhill sliding of the patient with sometimes again permanent residual side affects.

Surgery Or No Surgery?

As a matter of fact . . .

Surgery is a last resort by the medical profession to correct muscularskeletal problems of aging i.e. knee, hip, and joint replacements when osteoarthritis and rheumatoid arthritis are inappropriately cared for.

This is a big mistake. Don't let this happen to you!

The U.S. is only 32nd in longevity despite all the supposed wonder drugs and technical advances. The average life expectancy of males is 76 years of age, while for females it is 80 years of age.

1/3rd of all Americans are obese which many believe is the leading cause of cardiovascular disease - Hence, Reduced Life Spans.

Last year 220 thousand people died from physician-induced mismanagement and drug interaction for symptoms similar to the ones previously mentioned in hospitals.

Lets look at some of the current medical treatments for conditions that promote aging or lessen expected life span and their effect. Recent studies show this in part.

Breast Cancer On The Rise - Due to wrong form of estrogen administered for post-menopause women. Chemotherapy and radiation treatment doesn't treat the cause.

Natural Anti-Inflammatory - Celebrex inflammatory blocker: Toxic to liver function and bad interaction with other drug medications.

Osteoporosis – Treatment with Estrogen causes bone loss not necessarily bone re-absorption.

Digestion - Conventional treatment takes Pepcid A.C. - causes increased gastric irritation that can burn out the stomach lining causing ulcers.

EYESIGHT – Glasses, Radical Keratotmy, a mixed success

To Decrease Smoking – Nicotine patches release a cancer causing oral agent in the system.

High Cholesterol – Lipitor works on enzyme pathway blocking the formation of cholesterol in the liver. It can interact with with MAO Inhibitors (Mood Modifiers that work with seretonin pathways causing toxic liver damage).

Alzheimer's Disease – Patients treated with pharmaceutical enzymes to stop the demyelination of Brain neurons puts stress on the lymph and liver system.

Mood Modifiers – Prozac, Zoloff, and Elevil – increases seretonin release in the brain can be habit forming and have harmful interaction with alcohol.

Sleep Disturbances –Sedatives (valium or Darvon) shuts the brain off and residues can do damage to brain tissue, i.e. memory, reflexes, and behavior.

Dizziness – Treated with ear operations, and drugs to stop inner ear pressure – side effects: toxic residues can cause latent (Future Health problems) – mostly ineffective treatment and outcome.

Decreased Energy - Given drugs that are stimulants- unfortunately they weaken the immune system and “burn-out” the Nerve System.

Diabetes: Insulin Treatments – basically only effective for Type 1 – treats the symptoms not the cause.

U.S. Medical Science has recently partaken in examining through double blind clinical research the effect of natural replacement hormones, enzymes, herbs, vitamins, minerals, anti-oxidants, creams, soaps, etc.

THE RESULT:

They have found the applications to be more cost effective to the patient as well as much less harmful and deleterious side effects in patient's bodies. The evidence is overwhelming and too voluminous to include in our concise report. (Information on this can be obtained through our office)

The importance here is to note that: (1) People can stay youthful longer and (2) People can have any one of the aforementioned symptoms of aging treated successfully through natural alternative products which get to the CAUSE of the problem and NOT address the symptoms only – so the symptoms don't return and the condition is alleviated. Wouldn't you like to add more quality of health to your years beyond your normal life span vs. lingering in pain, disability, and sickness?

QUESTIONS FREQUENTLY ASKED

Q: I am afraid of needles, does this testing hurt?

A: Not to worry, these tests are simple, non-invasive procedures to determine levels of different system operations in your body that don't involve the use of needles.

Q: Will my insurance pay?

A: It depends on the type of coverage. First we check coverage and will attempt to get this pre-authorized.

Q: What if insurance doesn't pay?

A: We have very affordable private pay / sliding scale plans that allow one to get the care they require. We also accept most major credit cards..

Q: How long will it take?

A: It depends on the problem. Usually 15-30 minutes is the usual time allotted for treatment.

Q: Is your care safe?

A: Yes, extremely particularly when compared to the side effects of overly prescribed medications and/or inappropriate use of surgery.
